Shanmukha **Saketha Ramanujam** S

/sakethramanujam | perceptiveproton.me | ramanujamsamavedam@hotmail.com | **in**/sakethramanujam | +91-984-804-5401 |

EDUCATION

GVPCE(A), Visakhapatnam
B. Tech. in ECE
Graduation: 2019
Cumulative GPA: 7.92 / 10

SRI CHAITANYA, Guntur
Intermediate
Percentage: 96.2

SRI VENKATESWARA BALA KUTEER, Guntur
Secondary School
GPA: 9.5

COURSEWORK

Real-Time Operating Systems
Computer Networks
Data Communication Networks
Digital Integrated Circuits
Data Structures and Algorithms
Digital Signal Processing
Numerical Methods

SKILLS

Advanced:
Python • MATLAB • Shell
Git
Intermediate:
Linux System Administration
Networking • Docker • Flask
Apache Airflow • JS • C
Machine Learning with Scikit Learn
Deep Learning with Keras
Cloud Computing with GCP
Go • Jekyll • Arduino • Raspberry Pi
Familiar:
C# • Unity Engine• Monitoring
Apache Kafka • Apache Bench
Selenium

VOLUNTEERING

Mentor, AI-Club, GVPCE, 2018 - 19
Club Coordinator, College Cultural Club, 2017 - 18
Volunteer, NSS Unit -II GVP, 2017 - 19

EXPERIENCE

Google Summer of Code Mentor with Beagleboard.org
April 2020 – August 2020 | Remote
- Co-mentored a project about implementing a bidirectional-bus using pocket-beagle device to add additional I/O capabilities using PRU based architecture.

Project Associate at Scientific and Industrial Research Centre, GVPCE
December 2019 – Present | Visakhapatnam, IN
- Responsible for development and deployment of Machine Learning for classification and analysis of opto-electronic sensor data.
- Devising and conducting experiments for Vibrational analysis of structures using opto-electronic instruments
- Development of software algorithms for in-laboratory systems.

Software Engineering Intern with Rorodata Technologies
June 2019 – November 2019 | Bangalore, IN
- Developed and tested performance of machine workflows in Apache Airflow.
- Responsible for handling CI, deployment and maintenance of services on Google Cloud Platform using services such as Gcloud Build and GitHub actions.
- Developed DataBot, a client library for using internal API's
- Performance and Load tested applications using Gcloud App Engine and Gcloud App Run
- Developed and Maintained a tool for managing datasets used for market forecast analysis.

SELECTED PROJECTS

N.a.a.S. Docker   Docker | Jupyter Notebook | Python
Simple and scalable Jupyter - Notebook as a service client for Linux based systems.

Snapi Launch Notif Server   Mongo| Discord| Python
Launch notification generator for Discord using Space flight news API

Predicting Air Quality   ML| Random Forests | Python
Developed and tuned a Multivariate Random Forests model for event classification.

Wireless Data Monitor   Socket Programming| Networking | Python
A socket communication system for sensor data transfer from Raspi to a remote server.

Gaze Point Heat Map   CV | Image Processing | Python
Viewpoint tracking and heatmap generation application using OpenCV

WC Chrome Extension   Web | JS
Simple word counter extension for chrome browser

Build Run Multiple   Web | GCP | Microservices
POC for serving multiple applications from same repo using Google Cloud Build Triggers

AWARDS AND RECOGNITIONS

GitKraken Ambassador | March 2019

Second Runner up, Game Design and Prototyping Competition by Unity India | November 2018

GitHub Campus Expert | September 2018

National Finalist (Top 45), L&T TS – Techgium Competition | April 2018
